Galaxy Robots Pack 01

✓ FX Unity Particles included ✓ 3 colours each
✓ Generic Mecanim & Legacy rig ✓ Rigged & animated

How to add animations to characters

- Now that you have created your character. How do you add animations to it? Super series's humanoid characters are humanoid mecanim ready. That means you can share any humanoid animations you have with the characters in this pack. But where do you find animations?
 - a. You can buy humanoid animations/ controllers from the Unity asset store.
 - b. Or create your own humanoid animations. You can create animations with any humanoid characters you have in a 3D software. Just set your character up as humanoid rig in Unity and share the animations with Ace series characters. Note that Ace series characters are not using shoulder bones in its humanoid rig.
 - c. Or download animations from Mixamo site here: <https://www.mixamo.com/>

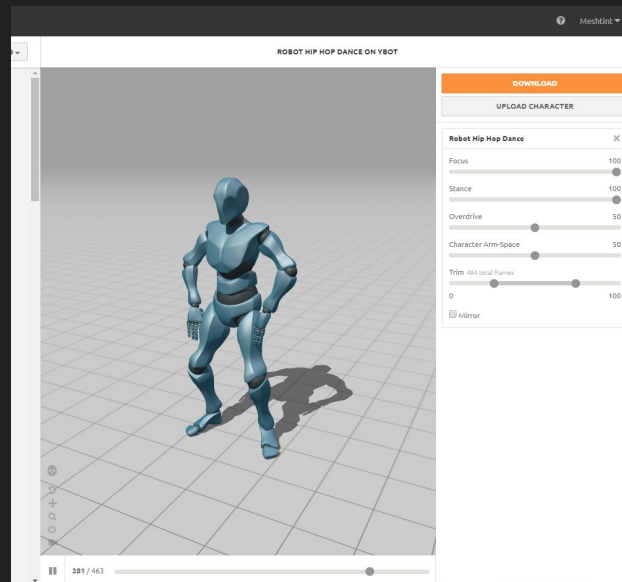

How to add animations to characters

Using Mixamo Animations

- Using Mixamo animations is easy. Simply go the site and download any animations you want.

DOWNLOAD SETTINGS

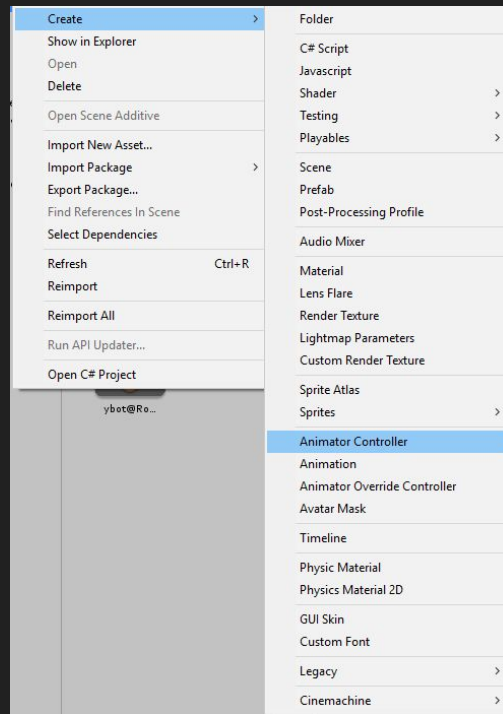

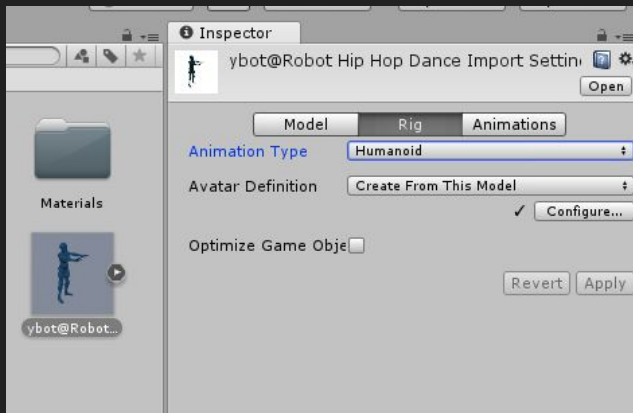

Format	Skin
<input type="text" value="FBX For Unity(.fbx)"/>	<input type="text" value="With Skin"/>
Frames per Second	Keyframe Reduction
<input type="text" value="30"/>	<input type="text" value="none"/>

How to add animations to characters

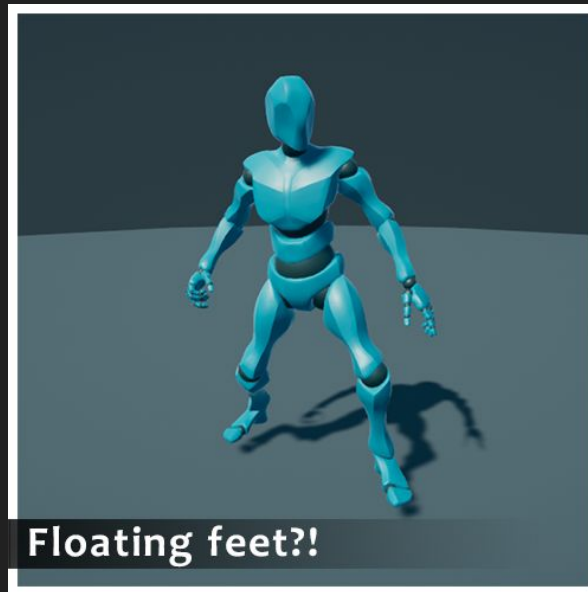

Using Mixamo Animations

- Import it into your project.
- Set it to humanoid rig. Hit apply. It's generic rig by default when you import it to your project.
- Create a new animator. Add the animation to the animator.
- Assign the animator to your character. Done!

How to add animations to characters

If your character's feet is floating...

Solution: [Check out our tutorial here!](#)

Or visit: <http://bit.ly/fixfloatingfeetunity>

Using controllers on characters

- If you are thinking to add a controller to the characters, you can use the Unity's free 3rd person controller.
- If you are looking for something more sophisticated, you may also consider using ready controllers in the Unity Asset Store. One good example of such controller is Game Creator. See link here: <http://bit.ly/UnityASGameCreator> . Note that we do not provide support for Game Creator. Please check the assets carefully before purchasing. If you have any questions on controllers, please contact the respective developers of the controllers you are looking at.
- You can also create your own controller if you at a more advanced level in using Unity.

Thank you for your purchase!
